

# ill Wind

Who knew that the world isn't safe I never knew that

Bad things (can) happen right at your door

Not everybody is your pal like in the adverts

Bad folk are going to want you on the floor

*There's an ill wind, there's an ill wind, there's an ill wind, there's an ill*

*wind.....*

*There's an ill wind driving up the valley*

*There's a Force 10 blowing off the sea*

*There's a hurricane hauling down the houses*

*All Hell's getting out and loose upon me!*

I know there's war somewhere else on the planet  
Hunger never stopped me from having my tea  
I pity the children crying in the desert (course I do)  
But mainly, I like nature documentaries on TV

*There's an ill wind.....*

*There's an ill wind driving up the valley.....*

What's going on, or did I miss the forecast?  
Was it showers, or everything turning bad?  
Dark clouds, don't even bother switching all your lights on  
There's lightning shooting down everything that you had

*There's an ill wind.....*

*There's an ill wind driving up the valley.....*

*D G Em A*  
*Ah.....*

*D G Em A*  
*Ah.....*

Lord save us this is really going to be a bad one  
There's not going to be any shelter from this storm  
No point in grabbing anything to hold on to  
It's too late to start ringing some kind of alarm

*There's an ill wind.....*

*There's an ill wind driving up the valley.....*

*Ah*.....
