

STAY WITH ME TONIGHT

I've closed the front door, the last of them gone

The room looks like Hurricane Hellish has blown

I'll get you a coffee you're not rushing off are you?

Come and sit down on my leather settee

There's nobody here except you and me

I'll just dim the lights and put on a CD

There's no need to be jumpy just make yourself comfy

Why don't you sit over here next to me?

I've been looking for something that I can believe in

Tonight my senses are hopelessly reeling

Please don't say that it's time you were leavin'

Stay with me tonight

There's no need to worry and no need to phone

There's no need for you to catch the last bus home

There's no need for a taxi so why not relax here

and leave all your cares till the morning has come

I've been thinking about you with me here alone

Wanting to be here not thinking of home

I think you're the most ... do you mind if I move closer?

Leather settees weren't built just for one

*I've been looking for something that I can believe in
Tonight my senses are hopelessly reeling
Please don't say that it's time you were leavin
Stay with me tonight*

*I've been looking for someone that I can believe in
Tonight my senses are hopelessly reeling
Please don't say that it's time you were leavin
Stay with me tonight*
